Re: LightSquared Subsidiary, LLC
Ex Parte Communication. IB Docket No. 11-109
IBSF File No. SAT-MOD-20101118-00239

I am the owner of a small land surveying business in northern Minnesota. My business relies on high precision GPS measurements to provide boundary surveys, construction surveying, plats and other survey products which support land development.

Because recent independent test results demonstrate that LightSquared's implementation will make this work impossible, I oppose LightSquared's request to affirm its license and its request to go forward with its plan. Surveying and engineering businesses will be unable to continue to provide cost effective services if high precision GPS is disabled. For me and for my industry, the effect will be catastrophic.

Please contact me with any questions regarding the vital importance of high precision GPS in surveying.

Sincerely yours,

Maureen Hayes
Professional Land Surveyor
